Anti-Ram Raid Security Bollard

168RAM

The 168RAM is a true Anti-Ram raid security bollard. The bollard is steel, 168mm diameter, 1200mm above ground and installed 800mm below in ground the 168RAM is suitable for government, industrial and commercial settings. The 168RAM is best installed to a 40mpa concrete footing with steel reinforcement. The 168RAM can be supplied in galvanised and/or powder coated finishes to match your company or clients colours. Custom reflective vinyl signage can be fitted as an option. A lifting point is installed and hidden under a machined polished fitted cap that is installed once the bollard has been installed to site.
